- *provide standard solar solution across the "INDIA".*

## WHY SOLAR PANELS ARE GOOD FOR THE ENVIRONME

SWITCH TO SPLAR FOR  
A BRIGHTER TOMARROW

- \*Solar energy is good for the environment***
- \* The sun never runs out of energy unlike oil or gasoline***
- \* Solar energy is renewable: meaning it will never run out it will always be there***
- \* Solar energy is more friendly to the environment then using electric or gasoline powered items.***
- \* Help to slow climate change .***
- \* Create local Industries "high-tech.***
- \* Reduce dependence on imported energy .***

**Projects-** SKJ Solar is a Solar Company based out Agra which has given hope to rooftop consumers to produce their own power. Solar rooftop system with its vast range of advantages is certainly the most reliable alternative source of energy. Unlike conventional energy sources using fossil fuels like coal, energy generated from solar rooftop system are more environment friendly and generate clean energy leaving almost zero or negligible pollution.

It has also emerged as a potential green energy source to address the climate change issues which is global worry. With the growing commerciality of solar energy, there is a demand for various kinds of solar power systems. In this summary, it is important to understand the different things of solar energy systems.

There are 3 types of systems:

- > **On-Grid Solar Roof Systems**
- > **Off-Grid Solar Roof Systems**
- > **Hybrid Roof Systems**

## General Scope of Work:

1. We shall conduct a detailed site visit with specialists to take accurate measurements, photographs, and other site-specific information for full design.
2. Prepare full system design to include civil, structural, electrical and mechanical components, with construction drawings and specifications.
3. Procure equipment and materials and deliver to site.
4. Perform complete system installation.
5. Test all electrical components in accordance with manufacturer instructions.
6. Commission the system to full operability.

## Expected support from Client:

Site-specific considerations will require assistance and cooperation from the client, as outlined below:

1. Provide access to work site for delivery of equipment and materials prior to and during project implementation.
2. Provide a suitable and secure space for storage of equipment and materials.
3. Facilitate interfacing with the client's resident engineering staff for consultation as needed.
4. Separate electrical loads as discussed in Part A (Grid Interfacing) and connect solar output to building load system.
5. All the Statutory clearances, if any, required for the Project

### Note:

The above bill of material & system design is subject to change with any change in project site, site layout and soil

condition and evacuation scheme. Such changes will have commercial implications.

Computer, internet connectivity and related hardware  
Construction water and power

Rooftop acquisition and titles.

Any permission with local authorities, state government or central government officials related to the solar power plant. All the statutory clearances and approvals are to be sought by customer.

These above stated tasks are in EXCLUSION

### ***Why Choose Us***

### **Reason For Choosing Us**

**We are certified solar installers who design and install solar energy systems in a safe and efficient manner.**

SHRI KISHORI JI SOLAR SERVICES

### ***100% Guarantee***

**We save consumers money, by providing a secure, dependable, and long-term warranty for their rooftop.**

### ***Quality Material***

**We provide strong and robust solar energy materials that make a difference**
